AngelCopilot Batch Report

Generated: run_fictional_triage_demo | Deals assessed: 4 | Attention deals: 2

All company names, product names, data, and sources in this report are intentionally synthetic sample content created for demonstration purposes.

Executive Overview

DEALS SCORED	ATTENTION DEALS	COVERAGE
4	2	2 deferred

Ranked Deal Snapshot

Company	Deal ID	Score (0-5)	Verdict	Attention	Reason
SyntheticCo-01 AlphaMesh	syntheticco_01_alphamesh	4.12	INVEST	YES	INVEST verdict and risk gates passed.
SyntheticCo-02 BetaDispatch	syntheticco_02_betadispatch	3.94	WAIT	YES	WAIT with high score and strong profile fit.
SyntheticCo-03 GammaUtility	syntheticco_03_gammautility	3.57	WAIT	NO	Deferred: below attention threshold.
SyntheticCo-04 DeltaWorkflow	syntheticco_04_deltaworkflow	3.05	PASS	NO	PASS verdict.

Individual Assessments

1. SyntheticCo-01 AlphaMesh (syntheticco_01_alphamesh)

SCORE	VERDICT	ATTENTION	PROFILE FIT
4.12	INVEST	YES	0.95

Attention reason: INVEST verdict and risk gates passed.

Profile fit method: average of sector and geography exact-match overlap (case-insensitive).

Deal tags used: sectors=AI, Infra SaaS; geographies=Europe, North America

Assessment execution: Full rubric, web sweep, reconciliation, and return model completed (YES).

Category Scores

Category	Score (0-5)	Rationale
Team	4.60	Domain-relevant operator profile.
Market	4.20	Large, process-heavy segment with productivity pressure.
Product	4.00	Workflow-native automation with clear user value.
Traction	4.10	Encouraging cohort behavior and activation trend.
Unit Economics	3.90	Healthy margin profile, but still early.
Defensibility	3.70	Moat path through embedded context and integrations.
Terms	4.00	Attractive cap for current quality of evidence.

Key Risks

- Enterprise sales cycles can lengthen close timing.

Rationale

Strong operations-focused thesis, credible early traction, and investable terms for a starter check.

Web Sweep Findings

- **Market:** Growing spend on infrastructure workflow automation. Reconciliation: Supports budget relevance.

External/Web Sources (Web Sweep)

These are external references gathered during web sweep (links/articles/pages), not local deal files.

ID	Source	URL	Date	Relevance
W1	Category operations automation note	`https://infra-research.example/ops-automation-2026`	2026-03-20	Synthetic market context.

Milestones to Monitor

- Recurring ARR activation ratio by quarter.
- Net expansion in top customer cohorts.

Key Unknowns

- Long-cycle retention durability beyond first 12 months.

Market Context

Infrastructure operations budgets support measurable efficiency spend.

Reconciliation Gaps

- Need clearer activation ARR split.

Profile Fit Call

Fits high-risk, small-check strategy with disciplined reserve policy.

Founder Questions

- What share of ARR is fully activated versus staged rollout?

Return Scenarios

Hypothetical check size: EUR 2,000 (profile-based).

Dilution treatment in scenarios: Included.

Scenario	Multiple	Probability	Projected Value	Potential Gain/Loss	Rationale
Pessimistic	0.9x	45%	EUR 1,800	-EUR 200	Growth stabilizes below plan.
Base	5.5x	40%	EUR 11,000	+EUR 9,000	Repeatable expansion inside core segment.
Optimistic	16x	15%	EUR 32,000	+EUR 30,000	Strong category position with broad rollout.

Final Verdict

Decision: INVEST
Score: 4.12 / 5.00
Attention: YES
Attention reason: INVEST verdict and risk gates passed.
Verdict summary: Strong starter-check candidate at current entry terms.

Assessment Evidence Appendix

Assessment Limitations

Synthetic dataset for sample reporting.

Input Documents Processed (Local Files)

These are local files ingested from the deal folder, including files extracted from zip archives.

- sample_deal/syntheticco_01_alphamesh_one_pager.md
- sample_deal/syntheticco_01_alphamesh_terms.pdf

Evidence Preparation Warnings

- No evidence preparation warnings.

Assessment Citations (Assistant Output)

These are references cited by the assistant in the assessment narrative.

2. SyntheticCo-02 BetaDispatch (syntheticco_02_betadispatch)

SCORE	VERDICT	ATTENTION	PROFILE FIT
3.94	**WAIT**	**YES**	**0.92**

Attention reason: WAIT with high score and strong profile fit.

Profile fit method: average of sector and geography exact-match overlap (case-insensitive).

Deal tags used: sectors=AI, B2B SaaS; geographies=Europe

Assessment execution: Full rubric, web sweep, reconciliation, and return model completed (YES).

Category Scores

Category	Score (0-5)	Rationale
Team	4.30	Strong founders with relevant execution background.
Market	4.00	Budget line is real but competitive.
Product	3.80	Practical workflow integration path.
Traction	3.90	Encouraging early results, still definition-heavy.
Unit Economics	3.60	Potentially good if services mix declines.
Defensibility	3.40	Early signals, not yet proven moat compounding.
Terms	3.80	Reasonable if revenue quality is validated.

Key Risks

- Revenue mix still includes onboarding-heavy components.

Rationale

Compelling operational wedge, but metric definitions still require cleanup before higher conviction.

Web Sweep Findings

- **Competition:** Category intensity remains high. Reconciliation: Supports a WAIT posture.

External/Web Sources (Web Sweep)

These are external references gathered during web sweep (links/articles/pages), not local deal files.

ID	Source	URL	Date	Relevance
W1	Vertical operations software landscape	`https://marketwatch.example/vertical-ops-ai`	2026-03-19	Synthetic competition context.

Milestones to Monitor

- Expansion in first 10 recurring logos.
- Services-to-software revenue mix trend.

Key Unknowns

- Retention trend after initial implementation cycle.

Market Context

Demand is real, but incumbents are shipping similar automation surfaces.

Reconciliation Gaps

- ARR definitions need normalization.
- Activation versus contracted metrics need clear split.

Profile Fit Call

Possible starter-check candidate if metric clarity improves.

Founder Questions

- How many paid recurring logos are fully activated today?

Return Scenarios

Hypothetical check size: EUR 2,000 (profile-based).

Dilution treatment in scenarios: Included.

Scenario	Multiple	Probability	Projected Value	Potential Gain/Loss	Rationale
Pessimistic	0.7x	50%	EUR 1,400	-EUR 600	Expansion underperforms.
Base	4.5x	35%	EUR 9,000	+EUR 7,000	Consistent expansion with improving mix.
Optimistic	12x	15%	EUR 24,000	+EUR 22,000	Broad segment adoption.

Final Verdict

Decision: WAIT
Score: 3.94 / 5.00
Attention: YES
Attention reason: WAIT with high score and strong profile fit.
Verdict summary: Worth continued diligence, but not conviction-ready.
Why not INVEST now:

- Revenue composition still ambiguous.

- Customer count definition needs normalization.

What would upgrade to INVEST:

- Quarterly ARR bridge by product line.
- Cohort expansion evidence across top accounts.

Assessment Evidence Appendix

Assessment Limitations

Synthetic dataset for sample reporting.

Input Documents Processed (Local Files)

These are local files ingested from the deal folder, including files extracted from zip archives.

- sample_deal/syntheticco_02_betadispatch_brief.md

Evidence Preparation Warnings

- No evidence preparation warnings.

Assessment Citations (Assistant Output)

These are references cited by the assistant in the assessment narrative.

- **id:** D1 | **source:** Company memo | **url:** `https://syntheticco-02-betadispatch.example/data/memo` | **date:** 2026-03-26 | **note:** Synthetic source.

3. SyntheticCo-03 GammaUtility (syntheticco_03_gammautility)

SCORE	VERDICT	ATTENTION	PROFILE FIT
3.57	**WAIT**	**NO**	**0.63**

Attention reason: Deferred: below attention threshold.

Profile fit method: average of sector and geography exact-match overlap (case-insensitive).

Deal tags used: sectors=Energy SaaS; geographies=Europe

Assessment execution: Full rubric, web sweep, reconciliation, and return model completed (YES).

Category Scores

Category	Score (0-5)	Rationale
Team	3.90	Capable but still unproven at current scale.
Market	3.80	Real demand, moderate competitive pressure.
Product	3.60	Useful but not yet clearly differentiated.
Traction	3.50	Pilot-heavy base with limited renewal history.

Category	Score (0-5)	Rationale
Unit Economics	3.30	Insufficient durability evidence.
Defensibility	3.20	Moat path still early.
Terms	3.40	Fair but not compelling enough for current proof quality.

Key Risks

- Pilot conversion uncertainty.

Rationale

Interesting product direction but too much uncertainty in conversion quality and delivery mix.

Web Sweep Findings

- No web-sweep findings provided.

External/Web Sources (Web Sweep)

These are external references gathered during web sweep (links/articles/pages), not local deal files.

No web-sweep sources provided.

Milestones to Monitor

- Pilot-to-annual conversion rate.

Key Unknowns

- Expansion path within existing logos.

Market Context

Moderate demand with several credible alternatives.

Reconciliation Gaps

- Need tighter conversion and renewal data.

Profile Fit Call

Low priority for immediate action.

Founder Questions

- What is paid renewal rate by cohort?

Return Scenarios

Hypothetical check size: EUR 2,000 (profile-based).

Dilution treatment in scenarios: Included.

Scenario	Multiple	Probability	Projected Value	Potential Gain/Loss	Rationale
Pessimistic	0.5x	55%	EUR 1,000	-EUR 1,000	Low conversion from pilots.

Scenario	Multiple	Probability	Projected Value	Potential Gain/Loss	Rationale
Base	3.0x	35%	EUR 6,000	+EUR 4,000	Moderate commercialization success.
Optimistic	8.0x	10%	EUR 16,000	+EUR 14,000	Faster expansion than expected.

Final Verdict

Decision: WAIT
Score: 3.57 / 5.00
Attention: NO
Attention reason: Deferred: below attention threshold.
Verdict summary: Keep on watchlist until conversion quality improves.
Why not INVEST now:

- Pilot-heavy traction with limited renewal visibility.

What would upgrade to INVEST:

- Two quarters of improved conversion and retention.

Assessment Evidence Appendix

Assessment Limitations

Synthetic dataset for sample reporting.

Input Documents Processed (Local Files)

These are local files ingested from the deal folder, including files extracted from zip archives.

- sample_deal/syntheticco_03_gammautility_pitch.pdf

Evidence Preparation Warnings

- No evidence preparation warnings.

Assessment Citations (Assistant Output)

These are references cited by the assistant in the assessment narrative.

- No citations provided.

4. SyntheticCo-04 DeltaWorkflow (syntheticco_04_deltaworkflow)

SCORE	VERDICT	ATTENTION	PROFILE FIT
3.05	PASS	NO	0.51

Attention reason: PASS verdict.

Profile fit method: average of sector and geography exact-match overlap (case-insensitive).

Deal tags used: sectors=Workflow SaaS; geographies=North America

Assessment execution: Full rubric, web sweep, reconciliation, and return model completed (YES).

Category Scores

Category	Score (0-5)	Rationale
Team	3.50	Execution capability not yet demonstrated at scale.
Market	3.40	Real but crowded budget line.
Product	3.10	Feature set appears easy to replicate.
Traction	2.90	Weak conversion and expansion evidence.
Unit Economics	2.80	Insufficient margin and payback clarity.
Defensibility	2.70	No strong moat indicators yet.
Terms	3.00	Not discounted enough relative to uncertainty.

Key Risks

- Limited recurring signal at current stage.
- Unclear differentiation versus incumbent workflows.

Rationale

Current signal quality is insufficient for near-term action; opportunity remains speculative.

Web Sweep Findings

- No web-sweep findings provided.

External/Web Sources (Web Sweep)

These are external references gathered during web sweep (links/articles/pages), not local deal files.

No web-sweep sources provided.

Milestones to Monitor

- Customer retention in first annual cohort.

Key Unknowns

- Whether product can sustain usage without high-touch support.

Market Context

Competing with established workflow incumbents.

Reconciliation Gaps

- Customer and revenue definitions are incomplete.

Profile Fit Call

Outside current priority set.

Founder Questions

- What is quarterly paid expansion trend?

Return Scenarios

Hypothetical check size: EUR 2,000 (profile-based).

Dilution treatment in scenarios: Included.

Scenario	Multiple	Probability	Projected Value	Potential Gain/Loss	Rationale
Pessimistic	0.2x	60%	EUR 400	-EUR 1,600	Commercial traction does not materialize.
Base	1.8x	30%	EUR 3,600	+EUR 1,600	Limited niche commercialization.
Optimistic	6.0x	10%	EUR 12,000	+EUR 10,000	Unexpected product adoption acceleration.

Final Verdict

Decision: PASS
Score: 3.05 / 5.00
Attention: NO
Attention reason: PASS verdict.
Verdict summary: Do not prioritize at this stage.
Why not INVEST now:

- Insufficient recurring traction proof.
- Weak differentiation signal.

What would upgrade to INVEST:

- Two strong expansion cohorts and improved economics.

Assessment Evidence Appendix

Assessment Limitations

Synthetic dataset for sample reporting.

Input Documents Processed (Local Files)

These are local files ingested from the deal folder, including files extracted from zip archives.
